ABOUT ME

I am a programmer who loves solving problems, optimisation, and exploring creative coding.

I have a background in games technology and enjoy breaking down complex problems into simple solutions.

I have taken part in multiple game jams and enjoy experimenting with a blend of logic and creativity.

My interests extend beyond game development – I enjoy the process of programming itself and love optimisation and helping to build intuitive systems.

SKILLS

Languages:

C++
C#
Python
HTML
CSS

Game Engines & Libraries:

Unity
Unreal Engine
SFML

Version Control & Organisation:

Git
Monday.com
